

Digital Technology Professional Supports - What's right for your teachers? There are 3 levels available

Beginning: I need support to use DT - Digital fluency support is designed to enable teachers and kaiako to confidently use digital technologies, programmes and devices. A digitally fluent person can decide when to use specific digital technologies to achieve their desired outcome and can explain why the tools they are using will provide those outcomes.

Developing: I want to know what the new DT curriculum is all about - The Nationwide Digital Readiness Programme will introduce teachers, kaiako and principals to the new Digital Technologies and Hangarau Matihiko curriculum content and teaching strategies. The programme will be provided through online and face-to-face support directly from our provider, tailored to individual schools, kura and kāhui ako learning needs.

Advanced: I understand and am ready to integrate new DTs into school-based curriculum) School leaders will be able to apply for **tailored DT PLD** centrally funded support as they consider how to integrate the new curriculum content into their teaching and learning programmes. PLD plans will be responsive to your needs, priorities and approach to delivering the new curriculum content.
