

Sitech Systems N.Z. Ltd

Until the end of Term one I have a GMD display (LED digital signage) that can be shown in full operation mode outside of your school so you can see first-hand what this could look like.

Just email me or phone and I will bring the panel in and quote to suit your application

Graphic Message Display Solutions

Sitech Systems offers high quality LED front of School signage

Packages can be customised to suit your schools requirements from a text based solution to full video and include the following:

- Full colour with high brightness suited for all outdoor applications
- High temperature resistant coating that absorbs direct light to help reduce glare, and improve the contrast ratio of the display.
- Great colour performance, higher contrast and refresh ratio with high luminance and definition.
- Enables your school to communicate with pupil's parents, in a clear informative format.
- The displays also allow for other revenue sources, with advertising for supporting companies bringing in additional income sources for the school.
- Connectability is via Wi-Fi direct with standard laptops.
- We include full ACM with polycarbonate vandalism protection.
- The display comes with appropriate software to control the screen content and comes complete with full sequencing and time scheduling.
